Education

JANUARY 2024 - AUGUST 2024

Atlas School, Tulsa, OK - *Diploma of Computer Science & Full-Stack Web Development*

Atlas provides a dynamic learning environment that combines hands-on collaboration with enthusiastic peers and instructors, building essential technical and interpersonal skills. Through weekly projects and a Professional Readiness course that introduces industry insights, Atlas's curriculum offers comprehensive preparation for a career in tech. The experience has strengthened critical thinking, adaptability, and a commitment to continuous learning, setting a strong foundation for future success.

Projects

MARCH 2024

Airbnb Clone - *Python & SQL - Back End Developer* - Project
- Simulates building a simplified version of Airbnb, focusing on backend development and full-stack concepts.
- Engaged in dynamic collaboration with peers across different project phases, leveraging teamwork and adaptability to drive progress and integrate feedback seamlessly.

AUGUST 2024

Down With The House - *Hacksprint - Python - Game Designer* - Project
- Developed a fairytale-inspired pixel game with a team, leveraging the Pygame library in Python.
- Designed the game layout on a whiteboard, drawing inspiration from pixel games to enhance art style and gameplay.

OCTOBER 2024

Implementing a Design from Scratch - *Web Design & Figma* - Project
- Designed an interactive website for the Oklahoma Aquarium using Figma, focusing on user experience (UX) and usability.
- Developed the site layout from scratch, incorporating business & contact information, and working as a team to bring our ideas together.
